

Women's Astrology Retreat with Lisa Stockley
The Celestial Self; The Astrological Moon and Sun
Friday 5 - Sunday 7 April 2024
Breathing Space Norfolk Retreat Center
Register early — Limited to 8 participants

The Celestial Self — The astrological Moon and Sun, known as the luminaries, are the shining centre of the natal chart. They speak to where we are coming from and where we are going, to our process of unfolding consciousness. Come and discover your key sources of illumination, visible in the astrological connections between the luminaries, the lunar phase and the Moon's nodes. This retreat weekend is an opportunity to get to know these key placements and kinships in your own chart in a supportive and peaceful setting. We'll explore the many mythologies of the Moon and Sun and the archetypes they carry. Diving deep into the astrological symbolism, you'll have plenty of time for personal work on your own chart. If you're seeking clarity in your journey and a stronger sense of your potentials, this is the retreat for you. Suitable for all levels – beginners welcome.

From Lisa — I'm a professionally qualified astrologer (D.F.Astrol.S) with two decades of experience reading both astrology and tarot. I see myself as a wild diviner, drawing inspiration from nature and spirit to give you a glimpse of the whole web of your life, your story, and your place in the pattern of the universe. I am interested in helping you to tune into your inner and outer seasons and cycles, to connect with your sacred self and your own personal story. Astrology gives us a new perspective on our life, providing clarity and context for both our inner and outer life events.
